LUCIAN AND MODERN INVENTIONS

By CHAUNCEY E. FINCH Saint Louis University

THEN comparisons are drawn between the ancients and the moderns, the former unquestionably show up to worse advantage in the matter of mechanical ingenuity. There were, to be sure, some ancients, like Archimedes, who showed considerable mechanical skill; but, as compared with modern contrivances, the best the ancients had to offer seems trivial. Even though the Greeks and Romans did not have the technical skill required for producing most of our modern contraptions, however, some of them showed a rather amazing ability at imagining the development of such devices. The use of *automatos* in the sense of its derivative, "automatic," goes all the way back to Homer. In the *Iliad* the gates of Olympus are described as being "automatic" (viii, 393). When Thetis came to the home of Hephaestus to ask him to make a suit of armor for Achilles, she found the god working on some tripods which were designed to go from place to place automatically (*Iliad* xviii, 373-7). Thus the author of the *Iliad*, in his imagination, anticipated by almost three thousand years garages with automatic doors, as well as vehicles guided by remote control. In the matter of robots, too, Homer was far ahead of Mrs. Shelley, for his character Hephaestus was aided in his endeavors by robot maid servants (Iliad xviii, 417-20) long before Frankenstein's monster made its appearance in the pages of literature.

Of all the writers of antiquity who gave free rein to their imaginations, there was probably none who, in so doing, anticipated a greater number of modern technical developments than did Lucian in his *True History*. In this work, by way of poking fun at Homer, Herodotus, Ctesias, and others who were not always too accurate in their statements, Lucian affirms at the outset that everything he says in his history is false. The only true remark in his work, he goes on, is his statement that he is going to lie. "I am writing, therefore," he says, "about things I have neither seen nor experienced nor heard from others—

things which are not and could not be to begin with" (*True History* i, 4). If Lucian could reverse the journey of Mark Twain's Connecticut Yankee and come forward in time, instead of

A CHRISTMAS GREETING

By John K. Colby

Phillips Academy, Andover, Massachusetts

Feriae laetae Sine labore, Tibi completae Christi amore!

going backward, he would probably be somewhat amazed to see how many of the figments of his imagination have become commonplace reali-

Among the fantastic adventures recorded by Lucian in his *True History* is a visit to the moon, which he found inhabited by strange people who, of course, had unusual customs. He learned, much to his surprise, that, among their other accomplishments, they had the ability to make a sweetsmelling oil out of onions (*True History* i, 24). Whether this exact feat has been duplicated by modern science, I do not know; but the chemist is able to make a sweet-smelling perfume out of coal, an achievement which constitutes a fairly close parallel.

Another unusual characteristic of Lucian's lunar inhabitants was that they had removable eyes. It was a common occurrence for an individual to take his eyes out of their sockets and hold them until he wished to see something, at which time he replaced them and looked to his heart's content. Very often people who had lost their own eyes secured substitutes from others (True History i, 25). If Lucian could see twentieth-century man restoring impaired vision by inserting contact lenses under his evelids, he would feel, perhaps, that his flight of fancy had not been so preposterous after all. The Greek writer remarks that wealthy people on the moon kept a reserve supply of eyes on hand (True History i, 25). It is just possible that some of the presentday users of contact lenses keep an extra stock to guard against emergencies.

In recent years there has been much talk about women's hosiery made of glass. But the idea of clothing made of glass is not new, for on Lucian's moon all the wealthy wore soft garments of glass (True History i, 25). Lucian was given two glass chitons to take with him when he left the moon, he says, but he lost them later on when he was swallowed by a sea monster (*True History* i, 27). While the rich on the moon were enjoying the luxury of garments made of glass, the poor had to be satisfied with clothing made of copper, for ". . . the regions there are rich in copper, and they work the metal by soaking it with water as if it were wool' (True History i, 25). This was presumably for the purpose of making it flexible. Thus Lucian may be said to have anticipated, in his imagination, the flexibility of copper wiring used so extensively in modern electrical equipment.

While Lucian was on the moon, a war broke out between the inhabitants of that region and those who dwelt on the sun. Soldiers from the two heavenly bodies, mounted on huge birds, gnats, and other winged creatures, met and fought a mighty air battle (True History i, 17). The word used by Lucian to designate the struggle, aeromachia (i, 18), has a distinctly modern ring about it. The Greek writer doubtless would have been amazed if he could have realized the fashion in which his imaginary air fighting was to become a terrible reality in the great air battles of the Second World War. Lucian also would have been surprised if he could have known how near he came to anticipating the modern use of paratroopers, when, in discussing the same air battle, he remarked of one group of soldiers: "The Anemodromi are infantrymen, but they are borne through the air without wings. The manner of their transportation is this: girding up their chitons, which ordinarily reach to their feet, and letting them belly out into the wind like sails, they are borne along just as if they were ships" (True History i, 13). Obviously the thing Lucian is thinking about is not the same as a modern parachute, but the resemblance is remarkably close.

Perhaps Lucian's most amazing anticipatory flight of the imagination is to be found in his remarks about his visit to the moon: "And I saw another marvelous thing in the palace. There is an enormous mirror over a shallow well. If a person goes down into this well, he hears everything that is said by us here on earth, and if he looks into the mirror he sees all cities and all nations, just as if he were present in person in each case. At that time I saw my own people and all of my native country, but whether the people there saw me, I am not able to say truthfully" (True History i, 26). Lucian warned at the beginning of his story that the things to be described by him "could not be"; but the development of short-wave radio broadcasting has long since made it possible to hear, if not "everything that is said by us here on earth," at least things said in all parts of the earth. Lucian, of course, was speaking of auditory contact between the earth and the moon. But even that has been accomplished, for a few years ago scientists were able to send a radio beam to the moon and hear it a few instants later when it was reflected back to the earth. Recent developments in television have already made it possible for a mid-western audience to see events as they transpire on the Atlantic coast. It seems probable that future developments will soon make it possible to see "all cities and all nations." One feels that Lucian would probably be much at home in our highly mechanized civilization.

"DREAM-BOATS" AND THE CLASSIC DRAMA

BY LILLIAN B. LAWLER Hunter College of the City of New York

TO MANY suffering by-standers, an all-time record of some sort in linguistic ineptitude seemed to have been reached when, not long ago, our ecstatic 'teen-agers began apostrophizing the objects of their affections as "dream-boats." Yet, oddly enough, the offending metaphor has a striking precedent in that stronghold of unimpeachable taste—the classic drama!

The likening of a human being to a boat, directly or by implication, is rather common in Greek dramatic poetry, in both tragedy and comedy. In the *Thesmophoriazusae* of Aristophanes, lines 1105-6, for instance, Euripides, quoting from his play *Andromeda*, says of his heroine, "...a maiden, beautiful as the goddesses,"

chained to a rock, "like a moored boat." Even more effective is the same tragic playwright's metaphor in the Andromache, lines 854-5. Here Hermione upbraids her father for leaving her: "You have left me, father,

SICELIDES MUSAE

A Poem for Christmas, 1949
By CHARLES C. MIEROW
Carleton College, Northfield, Minnesota

Muses of Sicily-shell-torn and desolate-

Mars and his minions have raged and departed.

Sing now (for gone are the years that the locust ate),

Sing now the song that the Mantuan started.

Paulo maiora—yes, greater than battle-lust—

Sing now of peace and of brotherly love.

Gone are the planes and the smoke and the swirling dust,

Still shine the stars and the sun, far above.

Call to our memory the child who once came to earth—

Heaven's great gift—and his message again.

(Cannon, machine-guns, and bombs are but little worth):

"Peace upon earth, and good-will unto men!"

stranded on the shore, alone and bereft of oars!"

The expression "to let out all the cable" (panta kalon exienai), used literally of a ship, is often applied metaphorically to persons, as if they were boats. In the figurative sense it denotes "to go to all lengths" in order to accomplish something. It is used by the Chorus in the Knights (756) to encourage the Sausage-Seller. A few lines later (762), the Chorus carry on the metaphor by admonishing him to "hoist the grapples" and "come alongside the (enemy) boat to board it." Still later (830), the Sausage-Seller himself employs a boat metaphor: "Why do you beat and thrash the water with your oars?"

Euripides also uses panta kalōn exienai metaphorically. In the Medea (278), the heroine laments the fact that her enemies are "letting out all cable" to pursue her, and that she has no "landing-place" to which she may go. In the Hercules Furens (837), Iris, bidding Lyssa drive Hercules

mad and goad him on to murder, tells her to "let out the gory cable."

The adjective kalliproros, "with beautiful prow," is, as we should expect, properly applied to boats (cf. Euripides, *Medea* 1335): but in the Greek drama we find it just as freely used to refer to human beings, both male and female. The conservative Aeschylus, for example, in the Agamemmon, lines 235-7, speaks of Iphigenia's "fair-prowed mouth" — a metaphor daring in any language! The same author, in his Seven Against Thebes, line 533, calls Parthenopaeus of Arcadia the "fair-prowed offspring of a mountain-dwelling mother." Medicean scholiast on the passage feels called upon to elucidate: "Kalliproros instead of eueides," he says, "since the prow is the face of a ship." Hesychius, too, notes the word, and glosses it "euprosopon"—"with handsome countenance.'

Great opportunities for jests and "gags" are implicit in the boat metaphor. Not long ago a newspaper columnist recorded Milton Berle's classic comment upon an infant swimmer who at the age of eight months was already being trained by an aquatic coach. "What's she training to be?" queried Berle. "A boat?"

Anaxandrides, a Greek writer of Middle Comedy, in his play Odysseus (34, 7; ap. Athenaeus vi, 242 F; cf. Eustathius, Od., 1642, 62; 1761, 49) is conveniently informative on another sort of "boat." "Does a fawning flatterer follow on one's heels?" he asks. "Then he is called a lembos." And a lembos, according to the lexicographers, is "a little, fast-moving boat with a sharp prow," or "a little boat dragged along after a big boat" (Eustathius, Od. 1642, 64; cf Nonius 535). In the Mostellaria of Plautus, the heroine's middle-aged nurse is named, significantly, Scapha, "Boat"
—or should we say "Scow"? Plautus' play is an adaptation of the Greek comedy Phasma, probably written by Philemon. Presumably, then, the metaphor is found in Greek New Comedy also.

Certain unknown Greek authors, if we may trust Hesychius (s.v. nausipodes), Photius (s.v. naupodes, 289, 14), and Eustathius (Od. 1515, 23-4), presented a variant of the boat metaphor in their use of the words nausipodes, naupodes. These words, meaning literally "boat-footed," were applied to island-dwellers. Eustathius' discussion of this metaphor might lead us to expect to find it in epic verse; but it does not appear in extant Greek epic. Whether the usage is dramatic or not we cannot determine; but it

THE CLASSICAL OUTLOOK

Entered as second class matter Oct. 7, 1936, at the post office at Oxford, Ohio, under the act of March 3, 1879.

BUSINESS MANAGER: HENRY C. MONTGOMERY, Miami University, Oxford, Ohio

EDITOR: LILLIAN B. LAWLER, Hunter College, 695 Park Avenue, New York 21, N. Y.

ASSOCIATE EDITORS: W. L. CARR, University of Kentucky, Lexington 29, Ky.; Konrad Gries, Queens College, Flushing, N. Y. SUBSCRIPTION \$1 PER YEAR. Annual fee of \$1 for membership in American Classical League includes subscription to THE CLASSICAL OUTLOOK

Published monthly, October to May inclusive, by the American Classical League, Miami University, Oxford, Ohio Copyright, 1949, by the American Classical League

has a whiff of Old Comedy about it. We should note, however, that the figure has nothing in common with our own striking colloquialism "flatboats," as applied to human feet!

Horrible as the "dream-boat" metaphor may be, things might, I suppose, be worse. We have not yet reached the point of calling one another "scows" or "barges." And perhaps the "dream-boats" will eventually and mercifully pass in the night! **ශ**ල්දින ශල්දින

GIVE THE OUTLOOK

If you have a friend who is a teacher or a lover of the classics, why not give him a subscription to THE CLASSICAL OUTLOOK for Christmas? Can you think of any gift that would be a better bargain at one dollar? Send in your order at once, and we shall notify the recipient before Christmas, on a Latin Christmas card. Address the American Classical League, Miami University, Oxford, Ohio.

NOTES AND NOTICES

The eighty-first meeting of the American Philological Association will be held at the Lord Baltimore Hotel, Baltimore, Md., on December 28, 29, and 30, 1949, in connection with the fifty-first general meeting of the Archaeological Institute of America.

The Southern Section of the Classical Association of the Middle West and South met at Tallahassee, Florida, on November 24-26, 1949, upon invitation of the Florida State University. Classicists would be interested in

"Why 'Go On' with Latin?", by Warren E. Blake, in School and Society for May 7, 1949, Vol. 69, No. 1794, pp. 334-5.

Recent newspaper stories of the marriage of an uncle to his niece, in Providence, R. I., are reminiscent of the marriage of the Roman emperor Claudius to his brother's daughter, Agrippina the younger. The latter marriage was legalized by a special senatusconsultum.

TROY

By HARRIET WEBSTER MARR Springfield, Massachusetts
Troy—yellow mounds of earth, shimmering in yellow light.

A ragged pine-tree crowning one ragged steep ascent;

Between its roots, potsherds blackened by the fires of Homer's Trov;

There below, the ringing plain of windy Troy;

There, the dry course of famed Scamander.

Far on the coast three small mounds, tombs of Achilles, Ajax, and Patroclus.

To the left, misty purple on the horizon, Tenedos, where the Greek ships stayed.

Behind, Mount Ida, a long range that has watched the centuries pass, nine cities rise and fall, remain long buried, then by Schliemann's faith be brought to

"Sic transit gloria mundi!"

But hark! The sounding verse of Homer rings in memory.

In the plain, shadowy chariots wheel and turn.

Before our eyes move hosts arrayed for battle.

From near the ancient Scaean Gate we watch, as did the Trojan

LETTERS FROM **OUR READERS**

A LATIN CHRISTMAS CAROL SERVICE

Professor Herbert N. Couch, of Brown University, writes:

"I am enclosing a copy of our re-cent Latin Christmas Carol Service, which I thought might be of interest to you. There was a good attendance -some three or four hundred-and

everyone seemed to enjoy participating in the program." The enclosed program is printed in

Latin. Persons participating are admonished: "Cantibus lectionibusque sacris non plaudendum est usque ad finem; cantate omnes, si vobis placet, cantus laetos Latine modo, non Anglice, vehementissime." After a "Praeludium" and an "Introitus," two carols were sung—"Adeste, Fideles" and "Somno Soluti." Then came the first lesson, in Latin, from Isaiah xl, 1-5, ix, 2, and ix, 6-7. There followed a solo, "O Mira Nox," and then two carols, "Serena Nocte Media" and "Ecce Chorus Angelorum." The second lesson, read in Latin also, was from Vergil's fourth eclogue. It was followed by two carols, "O Viri, Este Hilares" and "Puer Nobis Nascitur." The third lesson, in Latin, was from Luke ii, 1-14. The chorus then sang the "Magnificat," after which the whole group sang "Quem Pastores Laudavere" and "In Dulci Iubilo." The last lesson, read in Greek, was from John i, 1-14. Following two carols, "Orbem Terrae Transvolate" and "Nox Silens," the service concluded with an "Oratio." The program gives credit to a "Magister Organi Pneumatici," a "Magister Canentium," and a "Magister Equitum," the latter being Professor Couch. The program should prove suggestive to other colleges and high schools looking for a new idea for a community service.

ENROLLMENT

Professor Mars M. Westington, of Hanover College, Hanover, Indiana,

"Our present enrollment in the Latin and Greek language courses has reached a new 'high.' The related courses, too, have a record registration. The number of classical majors surpasses any figure of recent years.'

FROM A RETIRED TEACHER

Miss Edith M. Jackson, a retired teacher of Latin, of West Chester, Pa., has taken a deep interest in giving her books and materials to young teachers and others personally, instead of disposing of them in her will. She

"At present I am gathering more of my books and materials together to pass on to inexperienced teachers. My collection of many years is now scattered in at least twenty different schools. I try to place it where it will be appreciated. Earlier this year I sent my twenty-five Italian posters, secured in Rome, to UNESCO to be used in their international rooms.

She says also:

"While I was walking to the post office recently, a young mechanic came towards me from the garage in which he was working. 'I have been watching for you,' he said. 'I need help on a Latin motto. What does Lux et Lex mean?' I translated it for him, and told him that it was the motto of Franklin and Marshall College. He said he knew that; also, that a student in that college had not been able to tell him the meaning of the motto! My young friend, the mechanic, had never studied Latin, but was interested in mottoes in that language. I have found this true of boys who have been in the service. Many a motto I have translated for them! One letter from a service man, during the war, was a great surprise to me. It was from a boy whom I had had in my classes for three years in high school. He had translated a poem by Catullus, felt that he had not done justice to it, and sent it to me for suggestions. How he had ever secured a Latin book in the South Pacific has ever been a mystery to

ROMAN HISTORY POSTERS

Miss Marguerite Pohle, of Bosse High School, Evansville, Indiana, writes:

"As a project for the third-semester Latin pupils who had finished reading the selections on Roman history in the textbook, each pupil was assigned a special topic for which he was to make a poster which would give a pictorial representation of his material. If the pupil had no artistic ability, he was asked to think of some means of presenting his material pictorially.

"For the period of the seven legendary kings, under the name of each king were listed the happenings of his reign. For instance, under Romulus we listed 'Founding of the city; rape of the Sabine women; deification of Romulus as Quirinus.'

"A boy who could not draw used a large star for each king. Inside each star he listed the important events of that king's reign. One girl had cut out the heads of the 'kings' from decks of cards and pasted them on her poster, giving each the name of a Roman king, and listing his achievements. One boy's 'stick men' were amusing.

"The period of the republic was too comprehensive for one poster, so various subdivisions were made. One pupil who had the wars as his assignment made a map of the territory acquired as a result of each struggle, the

>>>>>>>>> INFORMATION, PLEASE!

Please send to the Director of the American Classical League Service Bureau, Miami University, Oxford, Ohio, a postal card giving the name and address of the presiding officers of your state and local organizations of teachers of the classics, and also the time and place of the next meeting of each of these organizations. Armed with this information, the Director will try to provide for all those attending the meetings lists of mimeographs and other materials which may be obtained at cost from the Service Bureau.

-W. L. CARR, Director

dates, the causes of the wars, and the generals. The poster on Roman religion had pictures of the Pontifex Maximus, the augurs, the haruspices, lists of their duties, a picture of a temple, and pictures of statues of some of the major deities. There was a poster on Roman government, and one on the struggle between the patri-

>>>>>>>>>

cians and the plebeians.
"Some of the names included on the Roman history posters were: Cincinnatus, Camillus, Curtius, Valerius, Manlius, Horatius, Mucius, Decius, Fabricius, and Regulus. Among the Roman girls and women of the republic listed were: Tarpeia, Cloelia, Cornelia, Julia, Calpurnia, Portia, Clodia. Among the Roman generals used were Camillus, Torquatus, Duilius, Regulus, Scipio Africanus, Fab-ius, Flaminius, Marius, Sulla, Caesar, Pompey. Other great men of the republic used were Junius Brutus, the Gracchi, and Crassus. The poster on the first triumvirate was very well done. It contained pictures of the three men seated around a table. Printed on the poster were the desires of each of the three men, and the final destruction of each. There was a poster on writers, with such names as Cicero, Lucretius, Catullus, Caesar, Sallust, and Nepos.

"There were also good posters for

the period of the empire. One poster put the names of the various emperors on steps, and under each step listed the accomplishments of the emperor. Women of the empire used on posters were Livia, Octavia, Cleopatra, Agrippina the Elder and the Younger, Messalina, Arria, Plotina, Domitia, Helena, and Zenobia. Writers of the period included Vergil, Ovid, Horace, Livy, Juvenal, Suetonius, the two Pliny's, Tibullus, Seneca, Lucan, Quintilian, and Tacitus. The poster on the barbarian invasions was colorful, with the Goths, Huns, and Vandals storming the gates of Rome and plundering the city. The poster on the decline of the Roman empire in the West and East enveloped Rome and Constantinople in haze, leading off into the Middle Ages. Posters on Christianity depicted Christ's death, persecutions of the Christians, the catacombs at Rome, scenes from the lives of the saints, and the Nicaean Council. Names used included Peter, Paul, John, Ambrose, and Constan-

"Each pupil showed and explained his poster to the class. The best posters were then put on the bulletin board. This project did much to fix the historical facts in the minds of the pupils."

A BRITISH CONFERENCE

Miss E. Lucile Noble, of Lansdowne, Pa., writes:

"I have on hand an announcement of the twenty-seventh annual summer conference of the Association for the Reform of Latin Teaching, to be held at The Levs School, Cambridge, England, from August 29 to September 3, 1950. The program includes lectures, discussions, and demonstration classes, in Latin and Greek. I have written Mr. C. W. E. Peckett, who is in charge, urging him to try to move the dates a little so that Latin teachers in the U.S. could get back by Labor Day. I am sending you this information now because it is very difficult to get ship passage less than a year ahead of time. Persons interested may write to me at 326 Lincoln Ave., Lansdowne, Pa.

"In the field of classical archaeology, the University of Durham, in England, runs a three-week course in actual field digging."

ශල්ලික ශල්ලික

THE LION'S SHARE

By Eugene S. McCartney University of Michigan

THE DAYS when familiarity of educated men with the classics could be taken for granted have gone, yet when errors in classical quotations or allusions occur in newspapers or magazines, there is a general rush to typewriters. During the early months of World War II the title "Fortissimae sunt Belgae," which served as the theme of an editorial in a great metropolitan newspaper, elicited a flood of protesting letters.

In Newsweek for May 22, 1937, there appeared on page 32 the following title of an article: "Tennis: To the Loser Belongs a Lion's Share of the Spoils." In the text (p. 34) the vanquished player is said to have received "a lion's share of the gate receipts." The inevitable "correction" appeared promptly, in the issue of June 19, page 2, in which a correspondent noted that a Professor Quiz informed his radio audience that the lion's share is the entirety, "for the reason that the lion shares his spoil with no one." The editors explained that the Professor undoubtedly based his definition on Aesop's fable, and they then gave this version of it:

"Three beasts joined a lion in a hunt. When the spoil was divided, the lion claimed one quarter in his capacity as King of the Beasts, one quarter as arbiter, another share for his part in the chase. 'As for the fourth quarter,' he said, 'well, as for that, I should like to see which of you will dare lay a paw upon it.' Awed by his frown, the other beasts yielded and silently withdrew."

This explanation must have been based upon one of the many variants of the Aesop story in which the lion takes all, but in the Aesop original the lion has only one hunting companion, the ass, and the lion does not frown.

On June 18, 1945, a caption in Newsweek stated (p. 54) that Moscow had taken over "the lion's share of the old Reich." A remonstrance was published only two weeks later, in the issue of July 2 (p. 6): "If you remember your Aesop, the lion's share is all." The editors made the following rejoinder: "Aesop and Mr. Guptill have one interpretation; Webster's dictionary and Newsweek pre-

fer the more modern meaning: the larger or the better part." The editors here imply that an original meaning has been changed, and they are obviously overhasty in attributing

THEN AND NOW

By Arthur Patch McKinlay University of California at Los Angeles Where oaken downs bloom with a leafy spray.

leafy spray, Before such things as homesteads came to be,

I saw a fay with curls up in a tree And coined "dryad" as a term for such a stray.

I went into the mountains once to play

And found a nymph there bending on her knee

Beside a spring. Her beauty made me

And call her "naiad," for such go there to pray.

But men no longer look with the poet's eye.

They trade their mountains for the civic flats

Where they can grow potatoes and speed a car;

Here is a bog buzzing with social gnats.

Yet seeing Lily in the swamp nearby, I do not long to be where dryads are.

such a preference to the Merriam-Webster (quoted later in this note).

\$

An unqualified announcement about the meaning of the phrase is to be found in a fascinating article by Wilson Follett, "The State of the Language," The Atlantic Monthly,

159 (Jan., 1937), 52: "How long is it since you have encountered the expression 'the lion's share' in the only meaning which makes a grain of sense? The lion in the fable took all there was to take, according to the inveterate nature of lions. But when we see the phrase in print today it is ten to one that we construe it as meaning the larger share, or anything over half. A recent volume of miscellaneous information (Uncommon Knowledge, by George W. Stimpson) listed 'the lion's share' in its legitimate meaning, and a reviewer in the New York Times Book Review [August 9, 1936] cited the item as a fascinating oddity. There you have the perfect obituary of a once useful and vivid allusion."

The Stimpson volume states (pp. 11-12) that the phrase has reference to the Aesop fable in which the lion

went hunting with a wolf, a jackal, and a fox, but, as already noted, the fable that represents the lion as taking all makes the ass its sole companion. Stimpson regards the meanings "nearly all" or "an unduly large share" as secondary and as due to a misapprehension.

A recently published reference book by Burton Stevenson, The Home Book of Proverbs, Maxims, and Familiar Phrases (The Macmillan Co., 1948), lists the lion's partners as an ass, a fox, and a wolf. In it the explanation of the division into four parts is nearly identical with that in the elaborately phrased version in Mons. de Meziriac, Aesop's Fables (Chicago, 1897), p. 83, where, however, the lion's companions are a leopard, a lynx, and a wolf. Stevenson concludes that the original meaning of "the lion's share" was "not the greater part of anything, but all of it." To substantiate his view, he quotes the Greek words that mean "all into one portion." In A. Chambry, Aesopi Fabulae (1925-26), No. 210, the very sentence in which these words occur states, logically or illogically, that the fox set aside a little for itself. Surely this fable justifies, not the meaning "all," but "a preponderantly large part." As will be noted later, both meanings go back to Aesop, and each has a long and interesting history in

The definitions given of the phrase in several dictionaries may be quoted here:

"All, or nearly all; the best or largest part;-from Aesop's fable of the lion hunting in company with smaller beasts, and appropriating to himself all the prey" (Merriam-Webster 1934); "the whole or an unduly large proportion of anything" (Funk and Wagnalls, 1946): "the largest or principal share or portion" (Century, 1927); "the largest share; an unduly large share; usually, any excessive appropriation made by one of two or more persons from something in which all have an equal right or interest, but sometimes without any invidious sense: as the lion's share of attention" (The Century Dictionary and Cyclopedia, Vol. V, 1911) (this is a clear and ample definition); "biggest share of anything" (Wyld); "the largest or principal portion" (Oxford Dictionary, Vol. VI, 1908). The four examples recorded in the last-named dictionary are dated 1790, 1836, 1865, and 1872, and all conform to this definition.

It is noteworthy that not a one of these dictionaries gives "all" as the

sole meaning and that they are unanimous in authorizing the meaning generally attributed to the phrase. It is also significant that the Oxford Dictionary, the only lexicon that quotes passages to illustrate the usage, contains no example that suggests the meaning "all."

In Aesop's fable of the lion and the

ass (Chambry, op. cit., No. 208) these two animals undertake to divide the prey they secured on a hunting expedition. The lion claims one third because he is the king (of beasts) and a second third as an equal in the partnership. He then warns the ass that the third part will prove to be its ruin unless it takes to its heels. Here

the lion does get all.

This fable would seem to establish beyond question the meaning we should attach to "the lion's share," but the lion appears in many other fables of Aesop. On a second hunting expedition he is attended by an ass and a fox (Chambry, op. cit., No. 210). When the ass makes a division of the spoils, the lion, becoming angry, kills and eats the ass. On being confronted with the same problem of partition, the fox gathers a great heap for its dominating partner and reserves but a small portion for itself. The appeased lion then asks it who taught it to make so wise a division. The fox replies, tersely: "The ass's fate."

In Europe, especially in France, both meanings of the phrase "the lion's share" have been widely used, and the long history of the influence of the two fables has been interestingly presented in a dissertation by Konstanty Górsky, Die Fabel vom Lö-wenantheil in ihrer geschichtlichen Entwickelung (Berlin, 1888).

Undoubtedly a familiar fable in Phaedrus (i, 5) has exercised great influence, directly or indirectly, upon many of those who assert that the lion's share means "all." It is worth

quoting here:

Numquam est fidelis cum potente societas:

Testatur haec fabella propositum meum.

Vacca et capella et patiens ovis iniuriae

Socii fuere cum leone in saltibus. Hi cum cepissent cervum vasti cor-

Sic est locutus, partibus factis, leo: Ego primam tollo, nominor quia leo; Secundam, quia sum fortis, tribuetis

Tum, quia plus valeo, me sequetur tertia:

Malo adficietur siquis quartam

Sic totam praedam sola improbitas abstulit.

A recent article by L. Herrmann, "Autour des Fables de Phèdre, Latomus 7 (1948), 201, associates with this fable the origin of the expression societas leonina, which was often on the lips of a Roman lawyer whom he identifies as C. Cassius Longinus. Its application is made clear in a passage which contains Cassius' opinion about the sharing of profits and losses in a partnership: "Aristo refert Cassium respondisse societatem talem coiri non posse ut alter lucrum tantum, alter damnum sentiret, et hanc societatem leoninam solitum appellare" (Corpus luris Civilis 29, 2; Pro Socio 17, 2). As Herrmann points out, the phrase in question was doubtless suggested by lines 1 (cum potente societas) and 4 (socii . . . cum leone) in the fable. It may also be noted that Erasmus connected it directly with Aesop (Adagiorum Chiliades Quatuor . Chiliadis primae centuria septima, No.

In Volume II of his monumental work, Les Fabulistes latins . . . (Paris, 1893-9), L. Hervieux gives at least fourteen versions of the Phaedrus fable just quoted, so that one is not at all surprised to find the following entry in a French dictionary

"Le partage du lion, tout d'un côté et rien de l'autre, par allusion à la fable où la chèvre, la génisse et la brebis sont en société avec le lion" (Littré).

The other interpretation, however, likewise appears in a French diction-

"La part du lion, C'est-à-dire la plus grand part que s'arroge de plus fort' (Grand dictionnaire universel du XIX siècle).

In Italian dictionaries also there are

two interpretations:

"La parte del leone. Secondo la favola; che, dovendosi tra le bestie cacciatrici compagne partire la preda, il leone si piglia tutto" (Tommaseo-Bellini).

"Farsi la parte del leone, dicesi di chi si piglia una parte multo più grande di quella che gli toccherebbe, e ciò per esser egli più forte de' suoi compagni" (Rigutini e Fanfani).

I have found only one interpreta-

tion in German usage:

"Löwenanteil, ein besonders grosser Anteil, den sich jemand kraft des Rechtes des Stärkeren zuspricht . . ." (Der Grosse Brockhaus).

"Löwenantheil, auf einen hervor-ragenden antheil überhaupt bezogen" (Grimm, Deutsches Wörterbuch).

It would be captious to argue, as one might at first feel inclined to do, that the presence of the word "share"

in "the lion's share" precludes the possibility that the word originated from the fable in which the lion takes all. There is an analogous use of the word "division" in a French proverb (which, however, is unfamiliar to my French friends to whom I quoted it):

"Montgomery's division, all on one side. This is a French proverb and refers to the Free Companies of the 16th century, of which a Montgomery was a noted chief. The booty he took he kept himself" (Brewer, Dictionary of Phrase and Fable, p.

751).

A recent example of the natural and prevalent use of "the lion's share" occurs in a novel by Ben Ames Williams, House Divided (1947), p. 1119: "By the way, Uncle Tony, our blockading venture is a great success. Captain Pew gets the lion's share [of the profits], but there's plenty for all of us." A loose extension of the phrase appears in Science Digest, 23 (January, 1948), 62: "Although the lion's share of the world's ice is situated in high latitudes, there are, nevertheless, glaciers buried beneath the surface.'

I do not recall having found in my own reading a single English sentence in which the words in question mean "all." The knowledge of Aesop possessed by those who are sure he affords justification for only one meaning might be described as synecdochic -taking the part for the whole. In view of the long use of this popular phrase on the Continent in both senses, one might suspect that it had some vogue in English before 1790, the date of the earliest example cited by the Oxford Dictionary, but no earlier occurrences of it are listed in the files of the Middle English Dictionary, a project that has long been under way at the University of Michigan. Perhaps some reader of this note may chance upon an earlier illustration of it.

FROM LATIN TO SPANISH

By Kevin Guinagh Eastern Illinois State College

W HEN LATIN teachers are constantly pressed to show present, tangible values to justify their subject, it is worth while to point out the tremendous advantage the student of Latin enjoys in the study of Spanish, especially in the building of vocabulary.

In preparing word lists for elementary Latin texts, editors have generally looked ahead to the reading of Caesar, and favored his vocabulary. In Spanish, however, elementary texts give a vocabulary intended to pre-

pare the student for no particular author but rather to fix in the beginner's memory those words that have the highest frequency count in a wide sampling of reading material. In trying to realize this objective, many compilers of Spanish texts make use of Milton A. Buchanan's A Graded Spanish Word Book, published by the Toronto Press. In this study Buchanan scored 1,200,000 words (the equivalent approximately of twenty novels of moderate size) found in seven wide classes of literature which were subdivided into a total of forty categories. As a result of this study, he was able to list in order the 6,702 words having the highest frequency in written Spanish.

An examination of the first 3000 words of this list reveals that about seventy-five per cent is readily recognizable as Latin; this is the usual estimate of the Latin element in Spanish. Actually in these 3000 words the advanced Latin scholar will find a higher percentage derived from Latin, for obscure derivations have not been counted; only those words have been included which a student with four years of Latin in high school should

be able to recognize.

These words are not identical in the two languages. As a matter of fact, only 112 are the same as the Latin nominative. But to this number we must add a great many more that are identical with the Latin ablative singular-a helpful way of remembering them, though philologically they are derived from the accusative, the final m being lost in the change. Such words as vino, medio, gente, arte, durante are readily understood by the Latin student, no matter how the change came about. To show more clearly the similarity between Latin and Spanish words, the final m of the Latin accusative will not be given in this paper.

In going from Latin into Spanish, Latin nouns ending in *tio* change that suffix to *ción*. Thus, relatione gives relación; attentione, atención; natione, nación; habitatione, habitación; posi-

tione, posición.

The initial qu in Latin is usually changed to cu: quale becomes cual; quando, cuando; quaestione, cuestión; quartu, cuarto; quasi, casi; qualitate, cualidad, generally written calidad.

This last word illustrates a change

This last word illustrates a change that the Latin student will find easy to keep in mind because it shows the easy transfer that takes place from the accusative ending *tatem* to *dad*. Thus, caritate becomes caridad; castitate, castidad; civitate, ciudad. The change of the Latin t to the Spanish d is frequently noted—e.g., matre, madre;

patre, padre; maritu, marido; oratore,

orador; pratu, prado.

The double consonant ll at the beginning of a word is a strange combination to the Latin eye; but when one remembers that this has come from a combination of c, f, or p with l, the word is easily retained. Latin clamare becomes llamar; clave, llave; flamma, llama; planu, llano; plorare, llorar; plenu, lleno; pluere, llover.

llorar; plenu, lleno; pluere, llover. The Latin c often appears as a g; e.g., securu, seguro; lacrima, lágrima; lacu, Iago; acutu, agudo; amicu,

amigo.

Such changes as p to b, as in Aprile, Abril, and the substituting of f for pb, as in philosophu, filósofo, offer no difficulty. Not so easily recognized in Spanish is the word beginning with the b which was f in Latin; e.g., fabulari, hablar; facere, hacer; formosu, hermoso; farina, harina; ferire, herir.

Sometimes li in Latin becomes j in Spanish, as in filiu, hijo; alienu, ajeno; consiliu, consejo; meliore, mejor; muliere, mujer. Sometimes the Latin x becomes j; e.g., exercere, ejercer; exemplu, ejemplo; luxu, lujo; exercitu, ejército. Latin words ending in x come over into Spanish as z in the singular, but follow the Latin form in the plural; thus crux gives cruz; lux, luz; felix, feliz; efficax, eficaz.

An initial s in Spanish is regularly followed by a vowel or a diphthong. When a consonant follows the s in Latin, Spanish prefixes an e. It is easy to pick these out of the alphabetized section in Buchanan's list: scandalu becomes escandalo; scala, escala; scribere, escribir; scrupulu, escrupulo; spatiu, espacio; spectaculu, espectaculo; sperare, esperar; spina, espina; statua, estatua; stimulare, estimular; studiu, estudio. In an initial Latin sc, s is dropped; e.g., scientia,

ciencia; sceptru, cetro.

There are some vowel changes which need only be pointed out to the Latin student, to be remembered. Accented short e becomes ie. This occurs frequently and is seen in such words as terra, which becomes tierra in Spanish; also, in dente, diente; recente, reciente; ventu, viento. The diphthong ae follows the same change, as in caecu, ciego; caelu, cielo. In this connection it must be remembered that when Spanish was forming, ae had the value of e, as it has in the Continental prounciation of Latin today. Likewise i becomes e in many words; thus lingua changes to lengua; vincere, to vencer; timore, to temor; minus to menos.

When the Latin student sees the diphthong ue in Spanish, he should substitute an o for it, to discover its Latin ancestor; e.g., bonu becomes

bueno; fonte, fuente; forte, fuerte; morte, muerte; porcu, puerco; porta, puerta; sorte, suerte.

The *u* in Latin frequently changes to *o* in Spanish. This is what takes place in the accusative of the second declension; for example, ramum becomes ramo. Other examples of this change are to be seen in musca, mosca; rumpere, romper; surdu, sordo.

Certain letters are lost when they pass from Latin into Spanish. The double consonants in Latin do not hold in Spanish, with the exception of ll and rr, which are regarded as separate letters. This will be no more difficult to understand than bad spelling in English. In the ct combination in Latin, c often disappears. Thus, defunctu gives difunto; punctu, punto; instinctu, instinto. Sometimes, how-ever, ct is changed to ch, as in lectu (bed), which becomes lecho; luctu, lucho; tectu (roof), techo. At other times, words ending in ctio in Latin change the ct to cc; hence we have lección from lectio, instrucción from instructio. In these cases, the first c receives the sound of k.

The dropping of the consonant d between two vowels is frequently noted in careless Spanish speech, and it is not infrequent in the written language; e.g., credere becomes creer; fidelis, fiel; possidere, poseer; com-

edere, comer; legere, leer.

Nothing remains of the Latin ending in such Spanish words as real, fácil, cruel, social, útil, capital, natural. It should be noted also that the final *e* of the Latin infinitive is lost

in Spanish.

One need only examine Buchanan's compilation to realize the value Latin has in the study of Spanish, the purest remnant of the Latin tongue. It must not be inferred that one should study Latin to learn Spanish, nor that Spanish is easy, even for the student of Latin; but there is no doubt that if any student is in a position to absorb Spanish rapidly, it is the one who has applied himself carefully to Latin.

•९१०७९१० "NUTS!"

Professor Edward C. Echols, of the University of Alabama, writes: "In 1944, Major General Anthony C. McAuliffe became a world-renowned figure overnight as a result of his emphatic and informal reply to the German demand for surrender of his 101st Airborne Division at Bastogne. General McAuliffe's classic reply was 'Nuts!' Five hundred years before Christ, Darius, King of Persia, sent a herald to Idanthrysus, the Scythian king, demanding his surren-

der. It being a wordier day, the reply of Idanthrysus is longer, but it closes on a note definitely McAuliffeian. The reply of Idanthrysus was 'Go howl!' (Herodotus iv, 121)."

ශරිදින ශරිදින

BRINGING LATIN TO A FOCUS

BY CLYDE MURLEY Northwestern University

E OFTEN think certain of our ideas unique, only to find later that others share them. The convictions in this paper were drawn from years of observation and practice, and had their inception when I was a high-school teacher. When, however, I have aired them, it was evident that they were in harmony with those of many other teachers of Latin. Some are also, in general, in harmony with the recommendations of the Report of the Classical Investigation. This all encourages me to think that, with many persons thinking along parallel lines, we can constantly improve our methods.

The daily lesson in the usual firstyear book is too miscellaneous and distracting for efficient instruction within the time limits of a brief class period: forms to be recited, a little new syntax, a vocabulary of unrelated words the choice of which is dictated by forthcoming reading materials, Latin-into-English phrases, Latin-into-English sentences (elements in which cannot be translated exactly in the absence of any context), English-into-Latin sentences, a paragraph of consecutive Latin. The teacher is reduced to a desperate effort "to get over the lesson," instead of carrying out a concentrated, effective procedure. I am in favor of less at a time. The elaborate paraphernalia described above affects me as the cumbersome armor of King Saul affected David, who preferred going after Goliath with a sling-shot and five pebbles.

It should not be insisted that there is only one way of teaching Latin well. Some teachers are brisk drill-masters, and good at that. A very few have adequate colloquial command of the language to teach it orally. Much can be said for the old grammar and reader method, which was before our time. Some consecutive Latin to be read seems the natural focal point, other material in the traditional lesson being used as incidental aids rather than sharing equal emphasis.

Many teachers would have pupils start sooner to read such Latin, read more, read it with greater facility and understanding. For this, definite techniques and guidance will be

needed. If it is read in the Latin order, it has a chance to teach itself. Parsing is a useful separate process on occasion; but "finding the subject" and "finding the predicate" do not constitute reading. A pupil often thinks he is expected to know more of the meaning of a sentence at a given point than an ancient Roman would have known there; whereas he should suspend judgment until a phrase or clause is rounded out, with later elements explaining the earlier. So he struggles to make some sense out of the passage prematurely, instead of waiting for the sense. This leads him to make reckless insertions and take other liberties with the text. Or he commits himself too soon to one of several possible meanings of a word, and clings grimly to that meaning while it leads him to confusion.

I am thinking rather of reading for comprehension than of some ultimate smooth English translation. The latter can become a fetich in the early years, being something which mature scholars find exceedingly difficult when they do it at leisure, with frequent recasting. The first step could well be reading a passage straight through, looking up no or few words, for what general meaning can be so acquired. One pupil reported from this procedure, "I've read the whole story and have the drift of it. Now I have to look up the vocabulary." It would be wrong, however, wilfully to exclude a growing power of anticipation, as the more advanced student becomes familiar with the structure of the language and begins to learn what to expect.

Without suggesting particular reading content, let me urge that the subject matter should deal, as far as vocabulary and mechanics permit, with representative and important Roman thought, which focusses on what is of cultural benefit to the modern child. This would exclude or reduce the usual gory vocabulary and the names of sundry lethal weapons. It could avoid other specialized words which provide few or no English derivatives.

A basic, usually physical, meaning of each word presented (apart, perhaps from the marginal vocabulary) should be insisted upon. But it must be basic, not one English word arbitrarily assigned. In one beginning book, only the meaning "pretty" is given or permitted for pulcher. This would require the pupil to make Aeneas say, "The thought occurred to me that it would be a pretty thing to die in battle." In a Latin sentence of five words, with three impartial meanings given for each—one of

which is to be taken at random—there are 243 possible mathematical combinations for the translation. If one basic meaning, say in bold-face type, is given for each, there is one possible combination. However rugged the initial effect of stringing together these fundamental words might be, it would bring vocabulary use to a sharp focus.

While I should suggest learning together lists of etymologically related words, those with kindred meanings, words with the same concrete or abstract suffixes, yet this involves complications with the requirements of the reading material. At least, such could be used as review lists, rearranged from the order of original presentation.

As for the all-important forms, I taught them years ago without paradigms by stressing in every possible way, including bold use of color, tense and case signs and detached personal endings. After six weeks or so of this, my class read sixty pages of other Latin and the first half of the first book of Caesar in the first year. By the same method, a college student who had never before studied any foreign language read more than sixty pages of Latin (with subjunctives, gerundives, and deponent verbs) in his first ten weeks. And he read it accurately and with growing facility.

In this procedure, one would present as soon as possible the signs of all the declensions, for instance, together. The pupil, even though a chart representing these could be ruled both ways, would read across for the prevailing endings of each case, rather than vertically. So he could avoid, where possible, the detour through particular declensions. After all, the purpose is to recognize the case, the declension being only a means (largely dispensable) to that end. Teachers have long used tense and case signs in connection with paradigms; but they can be made the main dependence. When I began this practice in high school, I planned to bring in the paradigms in the third year, for such as continued Latin, as a coordination and review of forms already familiar. But, by use of the signs, the pupil's attention is focussed on the particular part of the word which is immediately significant for him in translation.

In syntax, it is the aim to focus on the main function and field of each mood or case, presenting the several constructions as illustrations of this. Language represents, not what is objectively true (though people have been known to use it for telling the truth), but how we regard and ex-

press things. The indicative represents things as known, though it also deals (in the future, for instance) with matters not actually known. The subjunctive, on the other hand, represents the future (with which it mainly deals) as contingent and uncertain. It is the mood of purposes which may not be attained, conditions which may not be fulfilled, and situations which exist only in the mind. In independent clauses, it expresses orders and suggestions which may not be carried out, wishes that may not be granted or are already denied. A child can see the difference between what is done and what is only thought: "We waited there till he came"-indicative. "We waited there for him to come" (but maybe he didn't)—sub-

Each case of the noun should be introduced as a whole, so that the pupil can become acquainted with it. The several constructions of that case could be given at once, not as extra requirements, but as illustrations of a general idea of the case as described.

What is the main business of the genitive? Why have one? The use to express possession, the changing status of ownership, is about the least representative of the several constructions. For the case deals mainly with basic, lasting relationships: legal parentage, identity (complete or partial), material, measure, quality. These are largely inalienable attributes. One's parentage cannot be changed. How can you separate a particular building from the material of which it is made, its size, the quality of its material and of the workmanship that went into it? Lucretius might say that the genitive deals with the coniuncta rather than the eventa of the word modified. Chesterton said you might (rather recklessly) free a tiger from its bars; but you had better not free it from its stripes, or you will free it from being a tiger.

The subjective and objective genitives, requiring beside them a noun of verbal meaning, seem to me distinctly different. They might well be taught separately from the unified group above. Of course they suggest whole clauses: "The singing of the bird"—"the bird sings." "The eating of the meal"—"someone eats the meal."

The dative as a whole can be presented to the pupil as warmer in its emotional appeal than the cool genitive. It is well unified, with the emphasis everywhere on the person concerned or the thing affected. The so-called datives of agency, possession, and separation are really datives of interest. To illustrate in the same

order with elaborate translations: "As the situation faced Caesar, there was the necessity of doing everything at once"; "a son is born, and that makes a difference to me"; "money was stolen, and the loss was mine." Indirect object also expresses interest. In fact, the indirect object is apt to be more concerned about an action than is the direct (if both are present). "The child gave a fish to the cat"; here the cat is gastronomically and vocally concerned, while the dead fish is apathetic. The interest expressed by the dative may go to the length of prejudice. "This boy is the finest fellow in the world-to (i.e., in the opinion of) his mother or his

That certain intransitive verbs, or verbs compounded with certain prepositions, take the dative, does not rule out the fact that such a dative names the person interested or the thing affected. All these constructions, then, really fall into one category. But the double dative is not so simple, containing as it does—along with the dative of interest—one of purpose or result. It includes a focus of the action or situation on a person, and also on a thing.

The subtlety of the Greek grammarians in seeing the object of a verb as a cause or provocation of the action involved led to the mistranslation of their term for the case as accusativus. This Roman term, in turn, is quite meaningless to us in the grammar. The simpler meaning of target or goal, which inheres in objective, makes the latter word preferable.

The objective case indicates the end of physical motion through space, place to which; or physical or mental action as ending in the direct object. These two constructions may be classed together. The other use of the case is to limit the area of an action, extent of space or time; the so-called Greek accusative might be taught as analogous to this. That is, it indicates the extent of application (to parts of the body or clothing) of the action of the verb.

The obvious thing to say about the ablative is that it is three cases spelled alike. It tells that from which something comes (source, etc.) or goes (separation); what it is with, or done with; or where it is. In each of the groups (separative, sociative-instrumental, locative), where a Latin preposition is expressed, it takes care of the meaning for the pupil. One can lean heavily, in teaching, on the Latin and English prepositions. Then, in a list of illustrations of the usual constructions, one can begin with the simple, physical meaning of the three

English prepositions, then by easy transitions go on to the figurative extensions. The three charts so formed would aim to stress the "from," "with," and "at" ideas, rather than to teach numerous constructions independently.

Grammarians differ as to the assignment of some constructions to one or another of the three ablatives, or regard them as of composite origin. In any grouping I might suggest I should not be thinking of historical grammar so much as of intelligibility to the pupil. In the causal ablative, which of these two expressions explains it more readily to the pupil?—
"He is in bed with measles," or "He caught cold from exposure." The second, I think. So I should assign cause to the "from" group, though means and cause are closely related logically, and means goes into the "with" group.

It has been suggested, then, that case-syntax could be introduced with two genitives, one dative, two objectives, and three ablatives. This would not mean discarding most of the legitimate case-situations, but seeing the four cases in terms of one to three central concepts in each instance.

Finally, if the teacher's faculties are not nervously dissipated through a mere miscellany of forms, constructions, unrelated words, and exercises, so that he has a simpler daily function; if he reads with the pupils more varied Latin of better thought-content, more of it, and all in the Latin order; if basic, rather than stereotyped or arbitrary, meanings of words are etymologically presented; if forms are integrated with a view to emphasis on function and ready recognition rather than on paradigms; if a simpler, more logical concept of the syntax is grasped and taught, in lieu of a welter of scattered construc-tions; the teacher himself, with the class, can be brought to a focus on the main task of reading Roman literature.

BOOK NOTES

The Wrath of Homer. By L. A. Mac-Kay. Toronto: The University of Toronto Press, 1948. Pp. ix plus 131. \$2.50.

The present volume is a worthy addition to the many distinguished Homeric studies produced by such New World scholars as Professor Combellack and the late John A. Scott. Representing the fruits of intensive research and written with no

concession to the layman, it is of greatest interest to the expert in Homeric scholarship, to which this writer lays no claim. Yet the thesis here defended is so clearly presented and so sensibly and pleasantly dis-cussed that any Homer "fan" will find both profit and enjoyment in its

perusal.

Professor MacKay believes and maintains that the Iliad is the skillful and artistic combination, by one supreme author, of plot elements taken from two previously current cycles of legend: a "Vengeance of Achilles," originally located in Epirus, and the familiar tale of Troy; and that the "Wrath of Achilles," and "all passages that presuppose the Wrath," are this poet's invention, created to serve as a link between the two groups of material he wishes to harmonize. The attempted proof for this theory is furnished in three chapters. "The Historical Background" (3-47) is a fascinating discussion, on the basis of archaeology, linguistics, and the sound common sense and clear thinking which distinguishes the whole book, of the characteristics of the Heroic Age, with results that vary considerably from the usually accepted picture of this era. "The Heroic Legends" (48-103) presents, in a closely reasoned and fact-filled exposition, "the belief that some important elements in the historic populations of Argos and Thebes, and of the peoples who played a major part in the Iliad, were previously settled . . . in the region about Epirus, and that in that region several famous legends took shape" (102). The reviewer found this section the least palatable and the least convincing (parenthetically, a good map would be a boon to the reader). The final chapter, "The Structure and Composition of the Iliad" (102-124), is again a masterly presentation of the author's hypothesis. A brief appendix and a well selected index close a volume otherwise noteworthy for its handy format, clear print, good paper, and comparative freedom from serious misprints.

Epicurus, My Master. By Max Radin. Chapel Hill: The University of North Carolina Press, 1949. Pp. xii plus 142. \$2.75.

When Atticus, before publishing Cicero's correspondence, carefully removed his own letters from the files, he probably prolonged his own life, but he certainly robbed posterity of a vast amount of information which would have supplemented and clarified many a half-revealing, halfconcealing letter in the corpus as published. And the possession of those letters would add immeasurably to our knowledge of Epicurean philosophy as it was practiced by one of the most highly cultured Romans in the last days of the Republic.

From what we know of Atticus, we can not conceive of his ever having written his memoirs, much less having published them. That lack has been partially met. A modern Epicurean, who is by profession a teacher of law but who is also an outstanding authority on things Roman, has had the happy thought of presenting Atticus to us as he imagines Atticus might have portrayed himself, had he written his memoirs.

Dr. Radin writes with unusual charm and sensitiveness and happily without distortion of history or confusion of chronology. Of the eightyone historical persons mentioned in the book, none is made to do or say anything that seems out of character or out of time. The dramatic date is the year 32 B.C., when the whole Roman world lay under the shadow of the final struggle between Octavian and Antony, and when Atticus himself was fully and fearlessly aware of his own approaching dissolution.

A few sentences from the very end of the book will give some idea of the author's dramatic power: "Atticula is with me every day . . . She is gaiety itself. A little too obviously. She has been reading to me-Plato chiefly, carefully avoiding the Phaedo. . . . We continued the pretense that I was only ailing a little and would be completely recovered soon. This morning even that pretense broke down. She read the speech to me that Plato imagined Socrates' using to his judges. She faltered when she began the last sentence and could not go on. I recited it to her and she fell sobbing in my arms. . . . 'And now,' says the Platonic Socrates, 'it is time to go; for me, to death, and for you, to life. Which of us goes to the better thing, no one knows but God." I think Plato was wrong. The gods do not know. Nor do I."

-W.L.C.

AMERICAN CLASSICAL **LEAGUE** SERVICE BUREAU

Please do not send cash through the mails. If you send cash and it is lost, we cannot fill your order. Please use stamps, money orders, or checks. The latter should be made payable to the American Classical League. If a personal check is used, please add 5c for the bank service charge. If you must defer payment, please pay within 30 days. Ordering should be done carefully, by number, title, type (poster, mimeograph, pamphlet, etc.). Material ordered from the Service Bureau is not returnable. After two trips by mail the material is likely to be too badly damaged for resale; since the Service Bureau is a nonprofit-making organization, it cannot absorb losses such as this.

The address of the Service Bureau is Miami University, Oxford, Ohio.
W. L. Carr, Director

The Service Bureau announces the following new or recently revised mimeographs:

448. A List of Secondary Latin Textbooks. Revised September 1, 1949, by W. L. Carr. 10¢

643. An Initiation Ceremony, including a Program of Twenty Questions. Can be used also as a radio or assembly program. By students of Mrs. Gladys Laird. 3 boys, 2 girls, many extras. 20 minutes. 25¢.

644. Life with Octavia. By Irene Grafton Whaley. A play in English, dealing with the home life of the Romans. 10 girls, 3 boys. 25 minutes. 25¢

645. Michael McGee Takes His A.B. Degree. By Ilanon Moon. From THE CLASSICAL OUTLOOK for May, 1948. A penetrating satire on our educational system. 15¢

646. An Ancient Choral Dance. By Lillian B. Lawler. Can be performed by any number of girls or boys. Requires no special ability or dance training. 15¢

647. Cultural Periods in Ancient Italy. By W. L. Carr. An outline for teaching "background." 5¢

648. Latin Address of the Public Orator of Oxford University at the Conferring of the Honorary Degree of Doctor of Civil Law on General Eisenhower. 5¢

649. A Roman Family Comes to Life. A play by students of Virginia Markham. 8 girls, 6 boys. 12 minutes. 20¢

652. Parallel Chronological Table for the Lives of Caesar, Cicero, and

STATEMENT OF OWNERSHIP

STATEMENT OF THE OWNERSHIP, MANAGEMENT, CIRCULATION, ETC., REQUIRED BY THE ACTS OF CON-GRESS OF AUGUST 24, 1912, AND MARCH 3, 1933.

Of the Classical Outlook, published 8 times yearly at Oxford, Ohio, for October 1, 1949. State of Ohio County of Butler

Before me, a Notary Public in and for the State and County atoresaid, personally appeared Henry C. Montgomery, who having been duly sworn according to law deposes and says that he is the Secretary-Treasurer of the American Classical League, publishers of The Classical Outlook and that the following is, to the best of his knowledge and belief, a true statement of the ownership, management (and if a daily paper, the circulation), etc., of the aforesaid publication tor the date shown in the above caption, required by the Act of March 3, 1932 embodied in Section 537, Postal Laws and Regulations, printed on the reverse side of this form, to wit;

1. That the names and addresses of the publisher, editor, managing editor, and business manager are:

Publisher: American Classical League, Miami University, Oxford, Ohio; Editor: Lillian B. Lawler, Hunter College, New York 21, N. Y.; Business Manager: Henry C. Montgomery, Miami University, Oxford, Ohio.

2. That the owner is: (If owned by a corp-

Ohio.

2. That the owner is: (If owned by a corporation, its name and address must be stated and also immediately thereunder the names and addresses of stockholders owning or holding one per cent or more of total amount of stock. If not owned by a corporation the names and addresses of the individual owners must be given. If owned by a firm, company, or other unincorporated concern, its name and address as well as those of each individual member, must be given.)

Owner: American Classical League Mi-

Owner: American Classical League, Mi-ami University, Oxford, Ohio; Officers: Walter R. Agard, President, University of Wisconsin, Madison, Wisconsin; Henry C. Montgomery, Sec'y-Treas., Miami University, Oxford, Ohio.

3. That the known bondholders, mortga-gees, and other security holders owning or holding 1 per cent or more of total amount of bonds, mortgages, or other securities are: (If there are none, so state): None.

of bonds, mortgages, or other securities are: (If there are none, so state): None.

4. That the two paragraphs next above, giving the names of the owners, stockholders, and security holders, if any, contain not only the list of stockholders and security holders as they appear upon the books of the company but also, in cases where the stockholder or security holder appears upon the books of the company as trustee or in any other fiduciary relation, the name of the person or corporation for whom such trustee is acting, is given; also that the said two paragraphs contain statements embracing affiant's full knowledge and belief as to the circumstances and conditions under which stockholders and security holders who do not appear upon the books of the company as trustees, hold stock and securities in a capacity other than that of a bona fide owner; and this affiant has no reason to believe that any other person, association or corporation has any interest direct or indirect in the said stock, bonds, or other securities than as so stated by him.

5. That the average number of copies of death issue of the publication sold or dis-

5. That the average number of copies of each issue of this publication sold or distributed through the mails or otherwise, to paid subscribers during the twelve months preceding the date shown above is

(This information is required from daily publications only)

(Signature of editor, publisher, business

manager, or owner.)
Signature of Sec'y-Treas. of Publisher HENRY C. MONTGOMERY

Sworn to and subscribed before me this 1st day of October, 1949. (Seal)

R. Fred Woodruff. Notary Public. State of Ohio (My commission expires February 15, 1951.)
